Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is the First Office Action on the Merits from the examiner in charge of this application.

Claim Objections

2. Claims 10-14 are objected to because of the following informalities: claim 10, line 4, "a second" should be "a second side". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 2,763,908 to Marschner.

Marschner discloses a bayonet latch comprising, such as shown in Figs 3-5, a first housing member 1 having first side and a second side with a flange provided on the first side to receive a rotatable locking member 6 having a slot 7; a second housing member 2 having a first side and a second side with a boss 11 provided on the second side to receive a stem 8 having a pin 10; wherein when the rotatable locking member 6 is in a first position and the second side of the first housing member 1 contacts the second side of the second housing member 2, the pin 10 passes through the slot 7 and further wherein when the locking member 6 is rotated to a second position, the second side of the first housing member 1 is held in contact with the second side of the second

housing member, a spring 15 disposed between the flange and the locking member 6 to bias the locking member away from the stem when the locking member is in the second position, the stem 8 is threadably received in the boss 11, the stem has a first member extending laterally outward from the stem and a second member opposite the first member and extending laterally outward from the stem to form a T, the second position is offset from the first position by 90 degrees, and an indicator provided on the locking member to indicate the positional relationship of the slot 7 with respect to the pin 10, with said indicator being defined as the slot 18 shown in Fig 3.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Greene, Cuva et al, Pratt, Attanasio, Hayes et al, Scalise, Sykes, Bidwell, Castle et al, Johnson, Zahodiakin, Grant et al, and Joffres et al all show structures similar to various elements of applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh V. Tran whose telephone number is (571) 272-6868. The examiner can normally be reached on Monday-Thursday, and alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571) 272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
